

Session Overview:

The Art of Working as a Team! Teambuilding workshop

Effective teamwork is essential to any organization's success. So much more can be accomplished working together than working alone. When a team works together in harmony and relying on the strengths of the individuals with a common shared purpose, high performance can happen. Without this alignment, productivity can become compromised causing the team to struggle to survive and thrive. Mastering the art of working as a team takes intentional focus and leadership skills.

In this session we will look at the dynamics of what it takes to work together effectively, align towards a clear purpose and goal and drive towards a desired outcome.

This session is aimed to deliver the following outcomes:

- Why working together can achieve better results than working alone
- Recognize the different team development stages and how behaviours show up
- The roles and responsibilities of the leader and followers of a team
- Problem solving tactics and strategies for creating a high performance team

This session is interactive and built around the philosophy that working as a team can be more effective than working alone.

Through experiential activities, discussions and group work, this session will focus on practical strategies and tactics to help you lead and be an integral member of any team.
